

Goolwa Regatta Week RC Yachting Results

The conditions were atrocious winds from the North to 25 or more knots and hot! Despite this a group of 20 or so sailors braved the conditions and while some did not quite make the water, perhaps this was for the best as unless the yachts had smaller sails (or were small to start with - TS16) then it was very difficult to sail especially downwind. See images of the event from the 'Images' link above.

LASER RESULTS

Jurgen was consistent and well deserved his win showing how to handle the trying conditions. Rick suffered a little with a rig one size too big for most of the day but was always in the mix.

2	MORRIS Rick	6	14	3	11	2	<u>dnf</u>	<u>dnf</u>	2	2	2

Underlined values are discards. Score for dns, dnf etc ~ 3

TS16 RESULTS

What a sight to see the 6 TS16's braving the conditions and generally handling them well. While Ken was the initial favourite, Bob pushed him later and the final result was won by Ken on a count back (3 wins to Ken, 2 to Bob). Ken was very proud of his result and the rest of the Durwards.

PHANTOM RESULTS

While Richard did not have a win, his consistent racing ensured a well deserved win. Warren was also in with a chance and probably has a few 'if only' comments to make. Brian did exceptionally well considering he only sailed the last three races but showed great speed up and down wind. Beating a laser in the last race was exciting even tho the laser was underpowered with a 'c' rig. George had great speed early and was unfortunately damaged in race 4 receiving redress of 5 points. He was unfortunately unable to overcome the damage and was unable to sail in the last two races. All up it showed clearly the need for Phantoms to set up the 'B' rig for these sort of conditions. Hopefully all those rigs will appear soon!
